## POLARA SELF-CORRECTING BALL

[www.northof90.com](http://www.northof90.com)

\$20 a dozen

Know up front that the Polara ball isn't legal in serious golf tournaments. But for weekend hackers out to have fun, it's a godsend. That's because the Polara reduces hooks and slices by 50% or more -- meaning you won't waste your day hunting for lost balls. The secret is a unique dimple pattern: The ball sports normal-depth dimples around the equator and shallow dimples around the poles. The result? The ball "self-corrects," minimizing the side spin that causes hooks and slices. All you have to lose is the time spent in the high weeds hunting for wayward shots.
